Dear Amy,

Thank you so very much for contacting me in response to a message pertaining to the singularly authentic [Billy Meier contacts](#), still ongoing in Switzerland for over...80 years.

Regarding the Stealth-UFO photos, here is one of the articles:

[The UFO-Stealth Photos that Could Prevent WWII](#)

As promised, below are links to some of the articles that will introduce you to the evidence, freely presented by Mr. Meier to military and private investigators, beginning in 1977:

Commentary from Academy Award-winning Special Effects Experts

"But, to reflect on the statement that's in the film, I also remember seeing a shot on the Super8 reel that showed a UFO circling around a fairly tall tree. According to that shot, we said that we can't conclusively say whether it's real or not, but it seemed impossible to stage that kind of a shot with a miniature (it would have to be hanging on a very tall crane, with wires – but even then the movements would be hard to achieve.) So, yes, in regards to that shot, we mentioned that we could definitely do it today with CG, but at the time these were supposedly shot – it would have been very hard, probably even impossible, to fake this kind of shot."

There is an even higher standard of proof, which I have focused on, i.e. the prophetically accurate - *copyright-verified* - scientific information that Mr. Meier has published over the past many decades.

I'm including only a few of the 250+ specific, error-free, non-theoretical examples we've documented:

[Billy Meier's Environmental Warnings](#)

At the risk of too much information, these articles comment on the now corroborated prophecies regarding a coming war with Russia, attacks on Finland, Sweden, Norway, etc., Russian troop movements to Arkhangelsk, dating back to 1987:

Thank you again. I will also add that Tucker Carlson would be a great person for this to be sent to. While he's on the other side of the political aisle, this information should be investigated for the sake of...*all* Americans.

Sincerely,
